SUMMARY

Full-stack developer and designer. Since 2022 I've built and run a Shopify Plus storefront end to end, plus the operations platform behind it. Today I orchestrate multi-agent AI workflows to improve delivery speed and quality.

EXPERIENCE

Senior Full-Stack Developer VoroMotors · Los Angeles, CA FEB 2025 – PRESENT

Full-Stack Developer VoroMotors JAN 2024 – FEB 2025

Web Developer VoroMotors DEC 2022 – JAN 2024

Responsible for the company's Shopify Plus storefront since 2022, with 1,100+ live pages and a catalog of 1,000+ products.

- Own the theme code (Liquid, JavaScript, CSS) and build product, landing and campaign pages with marketing.
- Build and integrate REST, GraphQL and webhook APIs for Shopify, carriers, partner platforms and internal services.
- Integrate and maintain 50+ third-party apps and trackers for reviews, financing, warranties, chat, analytics and affiliates.
- Own technical SEO and site speed, from structured data and metadata to Core Web Vitals, crawl and index control.
- Built and launched the official Arctic Leopard US storefront from zero after VoroMotors secured the brand's US distribution.

2026 HIGHLIGHTS

14 third-party tools replaced	**1,100** platform releases since June	**63%** faster interactions (INP)

VoroShip IN-HOUSE OPERATIONS PLATFORM · JUN 2026 – PRESENT

One platform for every department. Designed with the CEO and the warehouse, support and phone teams, and built as a single Node, Prisma and PostgreSQL app that replaced the company's WMS and ERP, Narvar, Tally and Quo.

- Built its order-tracking API and checkout extension, the multi-carrier rate engine with freight routing, the scan-to-ship gate and an MCP server that gives AI agents scoped access to the platform.
- Built My Garage, a passwordless portal for warranty registration, order and claim tracking, service requests and a forum.
- Built the Rust Shopify Function and admin rules editor behind every checkout's shipping rates; liftgate and tracking extensions.
- Designed and run the team's AI delivery pipeline. Multi-agent Claude Code workflows, MCP tooling, spec to tested pull request.

Freelance Web Developer Self-employed · Los Angeles, CA APR 2021 – NOV 2022

- **Ideal Living and AquaTru Water**, May – Jul 2021 and Aug – Nov 2022. Built WordPress pages from design mockups, then AquaTru's WooCommerce store with the Flatsome theme, Matomo analytics and Yoast SEO.
- **JRM Security**, Mar – May 2022. Co-designed the company's responsive site with its CEO, then built and launched it in HTML, CSS, JavaScript and PHP, and managed its hosting on Linux and cPanel.
- **Neueday**, Apr – May 2021. Launched a startup's Shopify store on a short deadline, with cart, checkout and payments, custom Liquid product pages, upsells and support widgets.

PROJECTS

Bomb Desk THREE.JS · DURABLE OBJECTS Multiplayer typing battle royale with server-authoritative rooms on Cloudflare.

Ticket Atlas LA DECK.GL · MAPLIBRE 3D hexagon map of 3.9 million parking tickets, two years averaged into one week.

Project MT TYPESCRIPT · THREE.JS Scroll-driven exploded view of an MT09 in 3D, with 49 parts orbiting the engine.

FBA Tracker REACT · SUPABASE Profit tracker for Amazon FBA sellers, with streaks and levels to keep the habit.
